el telón de fondo, original de george tsypin (autor de los diseños para el trio en cuestión), claramente sugiere oscuridad, incitando a la somnolencia.

as for substances such as kava, betel nut, coca, cannabis, opium, and various hallucinogens, each has benefited, not unlike alcohol, from being an indigenous product.

it also encourages viewers to tell major pharmaceutical companies including merck, pfizer, and bristol-myers squibb, plus the fda and cdc that "you are inclined cold turkey."

i do however assure you that you will be advised by my department of any change in these circumstances as soon as it is practicable to do so.
